REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests an extruder head for producing a plastic strand formed as a flexible or rigid tube, and for communicating with an outlet of an extruder, comprising: a nozzle tool that includes a mandrel and a nozzle ring, which define an opening gap, an actuating drive for controlling an opening width of the opening gap which is varied by an axial relative motion between the mandrel and the nozzle ring; and a suspension element and an extrusion element, detachably connected to the suspension element, which extrusion element has connections and flow channels for a plastic composition to be extruded and is equipped with the nozzle tool, the actuating drive being disposed on the suspension element and detachably connectable to one of the mandrel and the nozzle ring. The closest prior art (Hsu 5,792,486) discloses an extrusion head having a means for quick connecting and disconnecting a die pin, but fails to disclose the suspension element detachable connected to the extrusion element and an actuated drive being disposed on the suspension element and detachably connectable to one of the mandrel and the nozzle ring.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
